

OUTSOURCING

OVERVIEW

BCLP makes outsourcing projects work. We work closely with clients to help build long-lasting, win-win relationships. Our clients trust us to lead the way in all phases of outsourcing, from planning initial strategy, through evaluating and recommending vendors, and into structuring, developing and negotiating contracts and all technical, operational and commercial artefacts. We ensure regulatory compliance and that outsourcing contracts are future-proofed against changes in law and to take advantage of advanced technologies, e.g. automation, digitisation, RPA and AI.

Our Outsourcing practice has extensive experience of all forms of ITO (including public, hybrid and private cloud deployment), BPO and business services outsourcing, in on-, near- and offshore delivery models.

Members of our Outsourcing Practice regularly advise clients on cross-border outsourcing deals between North America, Europe, and Asia. Our global team serves a wide arrange of areas and industries, including the banking, insurance, asset management, consulting and professional services, energy and utilities, information services and technology, digital media, transportation, online retailing, agritech, telecommunications, and manufacturing sectors.

BCLP has the accompanying scale, experience and joined-up, full-service capability, including subject matter knowledge in compliance and regulation, labor and employment, data protection, taxation and outsourcing dispute solution to deliver on your business critical outsourcing projects.
